Biodynamics2024

BIODYNAMICS

Regenerative farm & environment practices, an introduction

Krinklewood Vineyard, Broke, NSW

Saturday 26th May, 2012. 9am – 5pm

GROWING SOILS FOR THE FUTURE - FOOD FOR TODAY

This event is supported by the *OFA Environmental Research & Education Trust*

You will learn how the biodynamic preparations contribute to the soil food web creating fertility and balance in your soil.
Biodynamics is a cost effective method of producing high quality plants, food and fibre with regenerative ecological outcomes.

Also applicable for garden enthusiasts.

This one day workshop will introduce you to practical aspects needed to apply biodynamics:

- **The life of the soil** • **Creating fertility in your soil**
- **Managing your natural resources**
- **Practical use of the biodynamic preparations**
- **Using the rhythms of nature and the planting calendar**
- **Prevention and management of Weeds, Pests, Diseases**
- **Meeting climate change challenges: Drought, Flood, Carbon sequestration**

Books will be available for sale

RSVP	**Please register by Friday 19th May, 2012**

Presented by Biodynamic Educators:

John Priestley

John is a third generation ecological farmer. He has been evolving his practice and knowledge of biodynamics for over 50 years. With his wife Dorothy he grows award winning citrus and beef cattle at Paterson in the NSW Hunter Valley. He is a wealth of practical knowledge with a keen eye for the small observations that can make a difference to farming.

Hamish Mackay

Hamish has been working with biodynamics for 35 years and travels Australia presenting introductory biodynamic workshops, providing growers with clear and practical methods for adopting biodynamics as a cost effective way to produce high quality food and fibre; at the same time improving our environment.
