

APPLICATION FOR HORN SHARES

BIODYNAMICS2024 PTY LTD
A.C.N. 136 709 781

Cow horns are a vital part of the biodynamic process; they have become a rare commodity in Australia.

To meet this challenge Biodynamics2024 Pty Ltd has sourced a supply of horns, and, to fund their purchase, has issued 5,000 x \$100 redeemable preference shares to raise the necessary funds for their purchase and invites you to participate in this subscription.

These shares will pay an annual dividend 0.5% above the 12 month term deposit rate at the Bendigo Bank on 1st June each year. Biodynamics2024 objective is to redeem, repay, these shares in five years or earlier depending on supply and activity levels.

The horns will be used to make biodynamic horn preparations for sale and will also be available for sale as horns. Horn quantities and distribution will be at the discretion of Biodynamics2024.

Your support of this important contribution to biodynamics in Australia will be greatly appreciated by many farmers, gardeners and consumers across the country.
