AN INTRODUCTION TO BIODYNAMICS

Viticulture and horticulture

WIRRA WIRRA VINEYARDS, McLAREN VALE, SA

Monday 19th and Tuesday 20th August, 2013. 9am – 5pm

Presented by:
John Priestley

John is a third generation ecological farmer. He has been evolving his practice and knowledge of biodynamics for over 50 years at Paterson in the NSW Hunter Valley. He is a wealth of practical knowledge with a keen eye for the small observations that can make a difference to farming.

Hamish Mackay

Hamish has been working with biodynamics for 40 years and presents biodynamics as a cost effective and enjoyable way to produce high quality food and fibre suitable for human health and well-being; at the same time improving our environment.

Biodynamics

Biodynamics encompasses a multitude of successful farms, vineyards, orchards and market gardens of all shapes and sizes on all continents. Biodynamics is known for enhancing food nutrition, quality and taste.

You will learn how the biodynamic preparations contribute to the soil food web creating fertility and balance in your soil with regenerative ecological outcomes. Biodynamics is a cost effective and personally rewarding method of producing high quality vines and grapes to make exceptional wines.

Applicable for commercial operators and garden enthusiasts.

This two day workshop will include:

- **The life of the soil**
- **Creating fertility in your soil with biodynamics**
- **Managing your natural resources**
- **Practical application of the biodynamic preparations**
- **Using the planting calendar to optimise your production**
- **Developing risk management: Weeds, Pests, Diseases**
- **Agriculture and horticulture as contributors to environmental health**

Books and biodynamic preparations will be available for sale
